Art Unit: 3764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a self adjust exercise apparatus, classified in class 482, subclass 8.
- II. Claims 7-12, drawn to a physiological stress testing method, classified in class 601, subclass 23.
- III. Claims 13-16, drawn to an exercise method for an exercise routine, classified in class 434, subclass 247.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
